**South Walker Creek Mine (meet bus at Civeo Coppabella, as per agenda):**

Website: <https://stanmore.net.au/assets/operations/>

South Walker Creek is an open-cut mine located 35 kilometres west of Nebo in Queensland's Bowen Basin.

The mine has been operating since 1996 and adopts a multi-bench, open-cut mining method utilising a dragline, and truck and hydraulic excavators. With a mine life of 50-plus years, South Walker Creek produced 5.9 Mt of high-quality low volatile PCI coal in FY21. South Walker Creek PCI is one of the highest performing PCI products in a steel blast furnace given its low volatility matter.

Stanmore Resources acquired BHP's 80% interest in BMC in May 2022 and 100% in early October 2022, becoming the operator of South Walker Creek.

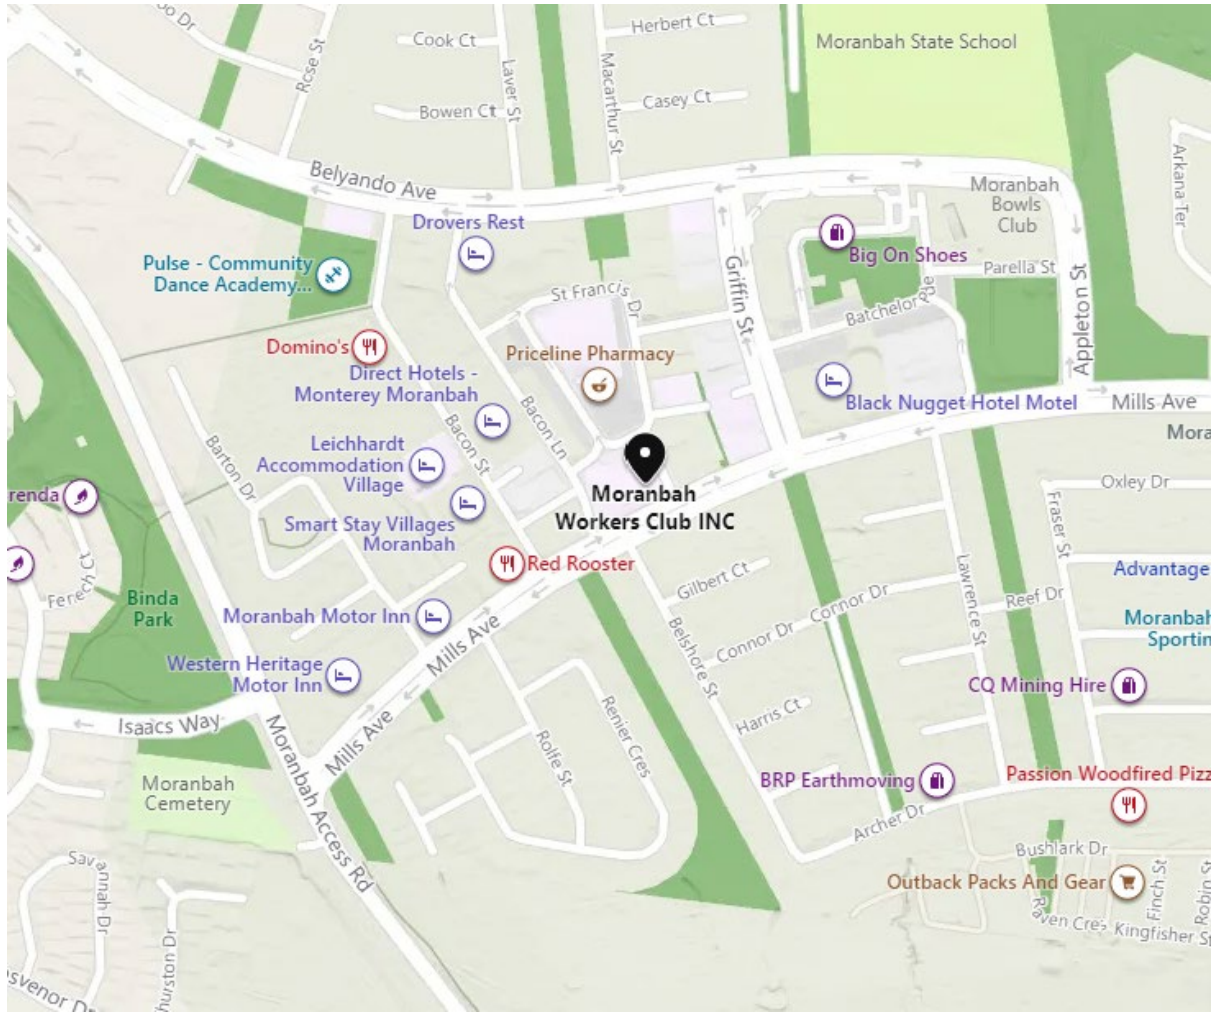

### Please note the following site tour pre-requisites

- Steel capped boots (lace-ups, laced to the top eyelet)
- Safety glasses or over-glasses (meeting Australian Standards for medium impact)
- High-visibility clothing (long sleeve shirts, long pants) or reflective vests
- Sun protection (hats, sunscreen)
